

Project Proposal

Team members: Peter Saliba, Athena Bouterakos, Joey Lee, Marco Rofail, Safia Jama

The website we are making is an informational website about the IMD program. The goal of it is to inform the user about 3 pre-selected classes and teachers from the program.

The target audience for the website is any student that wants to apply to the IMD program. This will help the future student to decide if he wants to apply.

All team members will be using Messenger to keep contact with each other, as well as Google Drive to share files. Thanks to these tools, we'll be able to exchange files and talk, even when we are not together.
